

Lightspeed Email Management with FYI

Stay on top of client relationships with every client email automatically captured

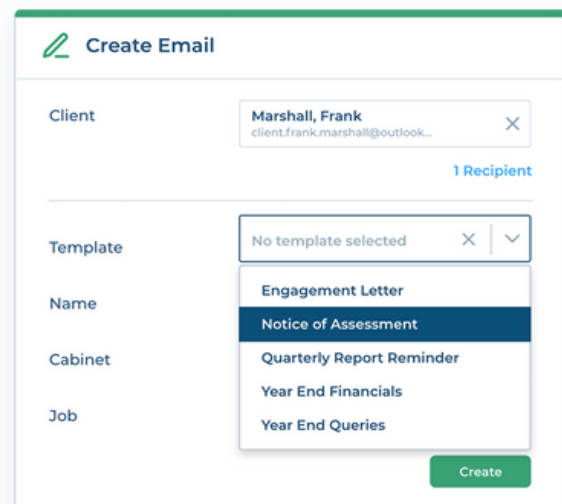

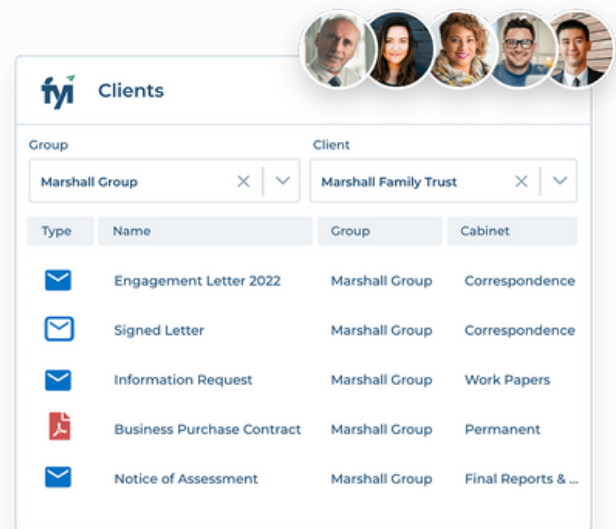

FYI's Email AutoFile engine is purpose-built for accountants, to automatically file client emails applying consistent filing rules practice wide and making them immediately accessible to the team so nothing gets lost.

- ✓ **Using FYI for Email Management**
- ✓ **How to transition to FYI for Email Management**
- ✓ **Key benefits of managing Emails with FYI**

FYI's Email Management allows you to stay on top of client relationships with all emails captured and visible in the client workspace.

Removing the manual filing of emails and individual inbox challenges, FYI automatically files client emails and attachments according to your practice's filing rules. Saving the team time every time a client email is sent or received.

New emails can also be created in seconds using templates and merge fields to incorporate data for personalisation without lifting a finger. Allowing you to standardise communication for a great client experience.

Unlock your inbox with Email AutoFile

Client emails that file themselves

Auto-file client emails and attachments to the client file based on your exact configurations, ensuring consistent filing and nothing is missed.

Every client email captured for quick visibility

Store all client emails centrally for visibility and quick accessibility, not locked out of sight in individual inboxes.

Create standard emails in seconds

Auto-create emails using standardised templates, incorporate merge fields to instantly personalise without lifting a finger.

Draft and review emails with built in digital workflows

Leverage FYI's collaboration tools and version control to draft emails on behalf of team members and send for digital review quickly and easily, eliminating unnecessary back and forth.

Next level efficiency inside Outlook

Access the FYI app within Outlook to file emails, delegate tasks and more. Eliminating the need to forward emails and allowing the team to collaborate efficiently and effectively.

The screenshot displays the FYI application interface within an Outlook environment. At the top, there's a navigation bar with the FYI logo and a 'Jobs' tab. Below this, filters for 'Group: Marshall Group', 'Client: Marshall, Lucy', and 'Job: 2021 - Individual Tax Return' are visible. The main content area is divided into several sections: 'Job Details' on the left with fields for Name, State, Budget, Estimated, Actual, Start Date, Due Date, Manager, and Partner; a central 'Phone call' section with a 'Create' button; 'Documents' with a list of files; and 'Tasks' at the bottom. A row of five user profile pictures is shown at the top right of the interface.

FYI's email management delivers an automated and centralised storage solution of all client emails, whilst enabling the team to create emails in seconds as well as efficiently collaborate on emails to stay on top of the client relationship.

How to transition to FYI for Email Management

Consider the following to help prepare for your transition to FYI to manage your emails.

Configure Email AutoFile

Using FYI for Email Management

Keep on top of client communication with auto-filing of all client emails accessible in a single view and jump seamlessly from group to client for quick access to relevant correspondence across the client group.

More benefits of managing emails with FYI

- ✓ **Consistent client experience**
Safeguard the client experience through standardisation of emails, ensuring the team are creating emails from practice approved templates saves time, provides peace of mind, and a great client experience.
- ✓ **Single source of truth**
Client emails and attachments are auto-captured to minimise risk of missing important client correspondence and increase efficiency via visibility for the team.
- ✓ **Collaboration**
Use Tasks and Comments to efficiently collaborate on emails with the team, eliminating internal noise from your inbox and maintaining visibility on what needs to be done.
- ✓ **Draft on behalf of another team member using digital workflows**
Seamlessly draft emails for review and approval on behalf of other team members using built in workflow technology.
- ✓ **Automations**
Utilise the power of automations to auto-create email communications, workpapers and internal tasks.

Email AutoFile is fantastic in that it actually keeps trail of the emails. When I come in the morning, they're already filed.

SCOTT MURRAY,
PARTNER
TESTER PORTER
