#2	FYI Actions	Share - No Email
#3	FYI Actions	<p>Create Email</p> <ul style="list-style-type: none"> An Email will be created from the "FYI: Welcome to your Portal" template Created email will be immediately sent The document will be AutoFiled <p>Notes</p> <p>Review and update the email template and sender as required, consider a custom User Role for the sender.</p>

How to import:

Before you begin - ensure your View has been saved in the Client list, the following filters have been applied in this example:

'Collaborate Portal - Yes' View

- Client Custom Field 'Collaborate Portal' = Yes
- Note: You will need to create this custom field and populate accordingly.

Step 1 - Save the import file locally

The first step is to download the zip file provided in FYI's help centre.

Simply save the file locally, for example, in your Windows Explorer Downloads folder. You do not need to extract the files.

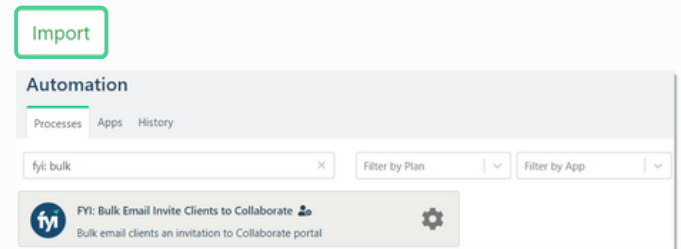

Step 2 - Import the files into FYI

Navigate to the Automations screen and click the Import button on the right-hand side of the screen.

Locate and select your saved "Bulk Email Invite Clients to Collaborate" file and click Open to import the automation.

You can also drag and drop the zip file to the Automation list view.

The Process and Templates will be imported into FYI.

Step 3 - Review the process

Review the Templates

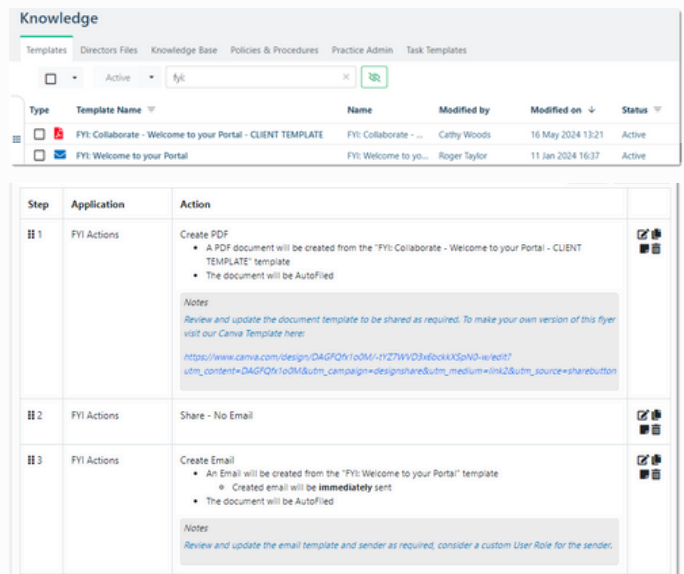

Locate the templates in Knowledge - Templates. The templates will import with the prefix FYI making them easy to locate.

- Review and personalise the imported templates (note: for the flyer Canva template refer to the help article)
- Update the template Status to Active.

Edit and Review Each Process Step

The Process is imported with the Status set to Draft. You can locate the process by searching in the "Search processes" field.

- Review the schedule and owner
- Review the filter, this example is set to run once per client
- Review and update each process step. Specific comments have been added to the steps where action is required. These will display in blue.

Step 4 - Test and run the automation

Click the Test button to display a list of all clients.

Search and select a specific client to run the test for and select Run Test.

You can navigate to the documents list in your client's workspace to review test documents.

When ready, set the Status to Active. We recommend running this from the process itself for any newly added clients to the list - you can also opt to schedule this to run automatically if preferred.

Simply locate your process and click Run.
